No part of this manual may be reproduced or distributed in any form or by any means, or stored in a database or data retrieval system, without the express written permission of Joe Pluta, who is the author of the manual and the computer source code.

All computer source code distributed with this manual, either on CD-ROM or available for downloading from sources such as the Internet, is Copyright © 2007 Joe Pluta, All Rights Reserved. The source code is for use in computer programs that you develop for internal use within your company. You shall not develop any written articles, books, seminar materials, or other manuals that include the source code provided with this manual or within the manual itself.

For any questions regarding your rights and responsibilities for using the computer source code distributed with this manual, contact Joe Pluta, who is the owner of the source code.

## **LIMITATION OF LIABILITY AND DISCLAIMER OF WARRANTY**

**No representation is made that any of the programs, computer source code, commands, or configurations described and depicted in this manual and in the computer source code accompanying this manual are error-free and suitable for any application that you may develop. Joe Pluta (author) and Rochester Initiative (publisher) make no warranty of any kind, expressed or implied, including the warranties of merchantability or fitness for a particular purpose, with regard to the information, examples, and computer source code presented in this manual and on the accompanying distribution media. Everything provided in this manual and on the accompanying distribution media is provided "as is". Author and Publisher shall not be liable in any event for incidental or consequential damages or any other claims, pursuant to your use of any of the techniques presented in this manual, or your use of the computer source code in programs that you develop, even if Author and/or Publisher have been advised of the possibility of such damages.**

**You are responsible for testing any and all programs, configurations, commands, and procedures presented in this manual prior to using the programs, configurations, commands, and procedures with important user data. You must ensure that adequate and sufficient backup of important user data is available, in the event that recovery of the important user data is required.**

## *Table of Contents*

<b>Chapter 1: Setting Up .....</b>	<b>1</b>
1.1 Chapter Goals .....	1
1.2 Requirements .....	1
1.2.1 Host Requirements .....	1
1.2.2 Workstation Requirements .....	1
1.2.3 WDSC Requirements .....	2
1.3 Installing the Software.....	2
1.3.1 First Things First .....	2
1.3.2 Installing the Software.....	2
1.4 Ready to Go!.....	4
<b>Chapter 2: Connecting to the iSeries .....</b>	<b>5</b>
2.1 Chapter Goals .....	5
2.2 Start WDSC.....	5
2.3 Create a New Connection.....	10
2.4 Configure Connection Startup .....	18
2.4.1 Option A for Configuring the Connection .....	21
2.4.2 Dynamically Changing your Connection .....	26
2.4.3 Option B for Configuring the Connection .....	28
2.5 Conclusions .....	36
<b>Chapter 3: Migrating from PDM to RSE and the Table View.....</b>	<b>37</b>
3.1 Chapter Goals .....	37
3.2 Filters .....	37
3.2.1 Creating a Library Filter .....	37
3.2.2 A Quick Guide to Using Filters .....	43
3.3 Using Filters.....	45
3.3.1 Deleting a Filter.....	45
3.3.2 Creating a Useful Filter .....	48
3.4 Tables .....	54
3.4.1 An Introduction to Standard Actions .....	56
3.4.2 Customizing the Table View.....	59
3.4.3 More on Working with Tables .....	61
3.5 Commands.....	64
3.6 Actions Revisited .....	66
3.6.1 User Actions.....	67
3.7 Searching.....	76

<b>Chapter 4: Migrating from SEU to the LPEX Editor .....</b>	<b>80</b>
4.1 Chapter Goals .....	80
4.2 Invoking the LPEX Editor .....	80
4.3 Customizing Your Perspective.....	82
4.4 Introducing the LPEX Editor.....	93
4.4.1 Syntax Coloring.....	93
4.4.2 Time to Meet the Program.....	94
4.4.3 What You're Going to Do .....	95
4.5 Basic Editing Capabilities.....	95
4.5.1 Using the Line-Oriented Commands .....	95
4.5.2 Preferences.....	98
4.5.3 Back to Work: Using Your Cursor.....	104
4.5.4 Adding a Subprocedure .....	109
4.6 Docking on the Right.....	122
4.7 Advanced LPEX Editor Features .....	123
4.7.1 The Outline View.....	123
4.7.2 Split Screen.....	128
4.7.3 Finding Matching Control Structures .....	130
<b>Chapter 5: Compiling Your Program.....</b>	<b>132</b>
5.1 Chapter Goals .....	132
5.2 Verify .....	132
5.2.1 Check Your Library List.....	132
5.2.2 Performing a Verify.....	133
5.3 Compiling.....	142
5.3.1. Default CRTBNDRPG Execution .....	142
<b>Chapter 6: Debugging, the Final Frontier .....</b>	<b>145</b>
6.1 Chapter Goals .....	145
6.2 The Setup.....	145
6.2.1 The Way SETENVLIB Used to Work .....	145
6.2.2 What We Want to Accomplish.....	146
6.3 Testing the Assumption.....	147
6.4 Debugging.....	149
6.4.1 A Little Green Screen Setup.....	150
6.4.2 Getting the Program Rolling.....	150
6.4.3 The Debug Perspective .....	156
6.4.4 Setting a Breakpoint.....	157
6.4.5 Run it Again, Sam! .....	160
6.4.6 Step by Step, Slowly I Turned.....	160
6.4.7 Changing Program Variables Dynamically .....	164
